On Paddle Assembly

Truflo TK Series Paddle Wheel Flow Sensors are the industry's most accurate sensors that offer exceptional value with virtually no maintenance. The sensor measures liquid flow rates in full pipes and can be used in low pressure systems.

The Truflo TK sensors are offered in a PVC, PP and PVDF materials making this model highly versatile and chemically compatible to many liquid process solutions.

The TK Series is available in size 1/2"-4" and require no special fittings to install.
