

Veeder-Root® Registers and Batching Systems

- Available on 1/2” to 4” DOM Series Flow Meters
- All-mechanical Means of Totalization and Batch Control
- Mechanical Batch Trip Valve Available on 1-1/2” and 2” Meters. Other sizes on Request.
- Excellent for Mobile Applications and Areas Where Power is Unavailable

The DOM series positive displacement flowmeters are available with Veeder-Root® registers, batch counters and ticket printer systems. Veeder-Root® register systems are the ubiquitous registration system known for their quality, accuracy and long service life.

Registers are available on DOM series meters from 1/2” to 4” body sizes. Registration in gallons or liters is standard. Others available on request. The product range includes mechanical totalizer, mechanical preset batch controller and ticket printer system. Mechanical automatic batch trip valves are available on 1-1/2” and 2” meters and on other sizes by request. The addition of a trip valve completes the total self-powered batch control system.

DOM series with Veeder-Root® 7887 reset register and optional air eliminator/strainer

DOM series with Veeder-Root® 7887 reset register, 788901 preset batch register and trip valve
