- Max. Measuring Length: 6000 mm (19.6 feet)
- Accuracy: 0.5% for L < 1900 mm (6.2 feet)
- Max. Pressure: 435 psi
- Max. Temperature: 265°F
- Connections:  
3/8" ... 2" NPT Thread, 1/2" ... 4" ANSI Flange
- Material: Stainless Steel, PVC, PP, or PVDF
- Connection Heads:  
Aluminum, PA, PP, ABS, or Stainless Steel
- Constant Level Indication, Regardless of Conductivity, Pressure, or Temperature
- Interface Level Measurement, Pt-100, or Temperature Switch Options (Upon Request)
- ATEX-Certificate: Ex ia, Ex d

Order from: **C A Briggs Company**

**Description**

The KOBOLD MM level sensor/transmitter is used for continuous level detection of all types of compatible liquids. It uses the proven float principle with magnetic transmission in a 3-wire potentiometer circuit. Its simple design with only one moving part, the float, makes the transmitter particularly reliable. A wide range of sensors are offered in different materials, designs, and connections, making them suitable for many measured-value data acquisition applications.

**Principle of Operation**

A magnet within the float activates various reed contacts within the guide tube. The reed switches in conjunction with a bank of resistors form a measuring chain that generates a resistance proportional to the height of the level. This sensing technique is similar to the operation of a sliding contact on a resistance potentiometer. The resistance sampled from the chain is transferred to a transmitter (option) which outputs a current signal proportional to the liquid level or, depending on the design, also allows limit values to be monitored. The transmitter can be mounted in the terminal box or as an external instrument. Local analog or digital indication can also be provided.

**Applications**

- Waste Water and Purification Plants
- Feed and Batching Tanks
- Chemical Tanks
- Manufacturing Industry
- Power Plants
- Pharmaceutical Industry
- Beverage and Food Industry

**ATEX-Certificate:**

- II 1 G Ex ia IIC T6 Ga (LOM 06ATEX2054X (supplement no. 3))  
 -20≤Ta≤+60°C
- II 1/2G Ex d II C T6 Ga/Gb (LOM 14ATEX2075 X)  
 1/2D Ex tb IIIC T85°C Da/Db

Possible options available (in case of electrical cable connection):

- PT100 (3-wire, category B)
- Temperature switch (N/C contact) at 150°F, 175°F or 220°F (other switching outputs on request)
- Interface level measurement at density difference 150 g/l

**Sensor Design**

**Float Designs**

Type	Form	Materials	Float Outside Ø (mm)	Height (mm)	Bore Hole Ø (mm)	Min. Liquid Specific Gravity	Temperature Range	Nominal Pressure at 70°F

D.. (LCD display)	..N8 = 1½" NPT	30 AF	M16.5	112 mm	316L SS	25 mm	176 °F
	..N9 = 2" NPT	36 AF				27 mm	
R.. (with 2 relay output)	..N8 = 1½" NPT	30 AF				25 mm	
	..N9 = 2" NPT	36 AF				27 mm	

<sup>1)</sup> Only with 4...20 mA transmitter. Loop powered display  
<sup>2)</sup> Size of process connection must accommodate float diameter  
<sup>3)</sup> Overall Length L includes thread length

**Head Selector Table: Float Size Compatibility with Head Type and Fitting Size (Continued on Page 12)**

Head Type/ Fitting Size Order Code	Float M05 (Ø42 mm)	Float M07 (Ø42 mm)	Float M08 (Ø38 mm)	Float M10 (Ø52 mm)	Float M13 (Ø38 mm)	Float M15 (Ø60 mm)	Float M16 (Ø60 mm)	Float M20 (Ø95 mm)
