2. Note

Please read these operating instructions before unpacking and putting the unit into operation. Follow the instructions precisely as described herein.

The devices are only to be used, maintained and serviced by persons familiar with these operating instructions and in accordance with local regulations applying to Health & Safety and prevention of accidents.

When used in machines, the measuring unit should be used only when the machines fulfil the EC-machine guidelines.

as per PED 2014/68/EU

In acc. with Article 4 Paragraph (3), "Sound Engineering Practice", of the PED 2014/68/EU no CE mark.

3. Instrument Inspection

Instruments are inspected before shipping and sent out in perfect condition. Should damage to a device be visible, we recommend a thorough inspection of the delivery packaging. In case of damage, please inform your parcel service / forwarding agent immediately, since they are responsible for damages during transit.

Scope of delivery:

The standard delivery includes:

- Differential Pressure Flow Meter / Monitor model: RCD
- Operating Instructions

4. Regulation Use

Any use of the Differential Pressure Flow Meter / Monitor, model: RCD, which exceeds the manufacturer's specification may invalidate its warranty. Therefore any resulting damage is not the responsibility of the manufacturer. The user assumes all risk for such usage.

5. Operating Principle

The Kobold Flow Meter is used for measuring and monitoring the flow velocity of liquids and gases. The device works in accordance with the well-known principle of the Venturi nozzle. A small pressure difference proportional to the flow is produced by the flowing medium at a cross-sectional constriction (nozzle) in the device housing. The shape of the nozzle is based on the particular flow value whereby flow characteristic remains constant over the entire measuring range. Pressure sensing ports are located in the flow body to measure the resulting differential pressure and send it to a differential-pressure measuring cell fitted in the display case. If the flow is exceeded, the differential-pressure measuring cell is protected by mechanical stops. In the case of mechanical displays the flow rate measured by the differential pressure measuring cell is indicated on a pointer element which is calibrated in l/min water or Nm³/h air. On electronic displays the mechanical motion is converted to an electrical signal by a Hall sensor. The electronics serves to display and monitor the volumetric flow.

6. Mechanical Connection

6.1. Check Service Conditions

- Flow
- Max. operating pressures
- Max. operating temperature
- Medium
- Mounting position

When the medium is not in our substance database:

- operating density
- operating viscosity

6.2. Installation

- Flow in direction of arrow (universal)
- Avoid pressure and tensile loads
mount inlet and outlet piping at distances of 50 mm from the connections
- Check connections for leaks
- Pay attention to the inlet and outlet path (see drawings below)

7. Electrical Connection

7.1. Mechanical Pointer Indication (..Z...)

without electrical connection

7.2. Compact Electronics: (..C30R, ..C30M, ..C34P, ..C34N)

see
Operating instructions supplement
for compact electronics with frequency output

7.3. ADI Electronic

see
Operating instructions supplement
for ADI electronic display

8. Commissioning

8.1. Mechanical Pointer Indication (..Z...)

Attention! Remove transportation safety screw and screw in the sealing screw from the bag into the thread M3.

8.2. Setting Compact Electronics

see
Operating instructions supplement
for compact electronics with frequency output

8.3. Setting ADI Electronic

see
Operating instructions supplement
for ADI electronic display

9. Maintenance

The measuring instrument requires no maintenance when the measured medium leaves no deposits. To prevent fouling the flow meter pressure sensing ports, we recommend that a filter is installed, for example the magnetic filter, model MFR. Work on the sensor and electronics should only be carried out by the supplier, otherwise the warranty is void.

10. Technical Information

10.1. Sensor Data

Measuring range:	see name plate
Measuring accuracy:	3 % of F.S.
Reproducibility:	1 % of F.S.
Process temperature:	RCD... mechanical: -20 °C...+100 °C RCD... electronic: -20 °C...+80 °C
Ambient temperature:	max. 80 °C
Max. operating pressure:	25 bar (RCD-1155, RCD-1160, RCD-1165) 40 bar (all others)
Protection:	IP 65

Materials:

Flow housing:	RCD-x1...: brass casting RCD-x2...: stainless steel 1.4581
Differential pressure housing:	RCD-x1...: brass casting RCD-x2...: stainless steel 1.4571
Pressure measuring cell:	stainless steel 1.4571
Venturi nozzle:	stainless steel 1.4571
Gaskets:	RCD-x1...: NBR RCD-x2...: FPM

10.2. Displays/Electronics

Mechanical pointer indication:

Display:	270 °
Display case:	aluminium / polyamide
Front cover:	polycarbonate
Option:	special scales for other gases and liquids. Please specify medium, density, viscosity, operating pressure and temperature

Compact electronics:

Display:	3-digit LED
Analogue output:	(0) 4 - 20 mA adjustable, max. 500 Ω
Switching outputs:	1 (2) semiconductor PNP or NPN, factory set
Contact operation:	N/C / N/O frequency programmable
Setting:	via 2 buttons
Supply:	24 V _{DC} \pm 20 %, 3-wire, approx. 100 mA
Electrical connection:	plug connector M12 x 1

ADI electronics

Display:	bar graph and 5-digit digital display
Analogue output:	(0)4-20 mA, 0-10 V _{DC}
Two switching outputs:	relay/changeover contacts max. 250 V _{AC} /5 A resistive load, max. 30 V _{DC} / 5 A
Setting:	via 4 buttons
Power supply:	100...240 V _{AC} \pm 10% or 18...30 V _{AC} /10...40 V _{DC}
Electrical connection:	pluggable terminal block via cable gland

13. EU Declaration of Conformance

We, KOBOLD-Messring GmbH, Hofheim-Ts, Germany, declare under our sole responsibility that the product:

Differential Pressure Flow Meter / Monitor model: RCD -...

to which this declaration relates is in conformity with the standards noted below:

EN 61000-6-4:2011

Electromagnetic compatibility (EMC) - Part 6-4: Generic standards - Emission standard for industrial environments

EN 61000-6-2:2005

Electromagnetic compatibility (EMC) - Part 6-2: Generic standards - Immunity for industrial environments

EN 61010-1:2010

Safety requirements for electrical equipment for measurement, control and laboratory use - Part 1: General requirements

EN 60529:2014

Degrees of protection provided by enclosures (IP Code)

EN 50581:2012

Technical documentation for the assessment of electrical and electronic products with respect to the restriction of hazardous substances

in accordance with the general requirements of the guideline

2014/35/EU	Low Voltage Directive
2014/30/EU	EMC Directive
2011/65/EU	RoHS (category 9)

2014/68/EU	PED
	<ul style="list-style-type: none">• Category III (IV) Diagram 1, vessel, group 1 dangerous fluids• Module D, marking CE0575• Notified body: DNV GL• Certificate No. PEDD000000R
