

The New Generation of Level Indicators

The Mechanics Are Simple:

As your bin material reaches the LevALERT® Indicator, it pushes against the rubber activator, turning the color tube from black to a bright yellow color. When material recedes it automatically darkens again... ready for the next fill!

Install the LevALERT® Indicator... anywhere along a vertical bin wall at key levels important to you. Used on most corrugated or flat bin walls up to 3/8" (9.5 mm) thick. Installs completely from outside the bin through only one 1-1/16" (27 mm) diameter hole

Optional Electrical Sensor:
Simple thread on this sensor to operate electrical horns, lights, motors, etc.

- No false echo's from dust
- No sparks
- Add any time

Monitoring bin levels

has never
been this easy

In a glance, the LevALERT® Indicator shows you the level of material in your bin while you remain safely on the ground. Whether you fill your bins once a year or several times a day, LevALERT® saves you time, labor and money.

You asked for.....

Easy installation: Fully assembled and ready to install from *outside* your bin

High visibility: Can be easily seen from 200 feet, day or night

No electricity required: Completely mechanical

Adaptability: Easily accessorized with an optional electrical sensor to activate horns, lights, motors, etc.

Increased safety: Virtually eliminates the need to climb bins

A money saver: Greatly improves your operation by saving you time, wear and tear on equipment... and your body. You only need a second to check how full or, sometimes more importantly, how empty your bin is.
